• **AUSTRALIAN DESIGN AND MADE**

INDUSTRIAL STRENGTH CLEANING POWER WITHOUT THE DAMAGE TO YOUR HANDS!

HANDS OFF include unique moisturising properties which mean regular use will assist in the prevention of drying of hands and skin conditions associated with other drying hand wash chemicals.

ASK YOUR SALES REPRESENTATIVE FOR A COPY OF THE HANDS OFF MATERIAL SAFETY DATA SHEET (MSDS)

After using **HANDS OFF** a residue of moisturiser will remain on the hands. Users simply rub this into their hands for approximately 20

seconds, and can continue to work, eliminating the discomfort of dry hands. The **HANDS OFF** moisturiser will be evident for several minutes after use, and in the long term will maintain healthier hands.

HANDS OFF IS NON-HAZARDOUS IN ACCORDANCE WITH WORKSAFE GUIDELINES

And is very easy to use, whether in the workshop or on site. **HANDS OFF** hand towels are a huge 210mm x 330mm and are made of strong industrial strength cloth with an abrasive like texture, so it removes stubborn messes with ease—not only from your hands, but can also be used on work benches and work areas.

HUGE LABOUR SAVINGS

Using **HANDS OFF** will cut your loss of productivity, taking the time it takes to clean hands down to at least **A THIRD** of the time spent using conventional hand washing methods.

For Example:

- On average a maintenance person working within

a manufacturing plant would clean their hands (say) six times per day (sometimes more!).

- Each time he will take (say) two minutes to get to the wash room, two minutes to wash his hands and a further two minutes to return to his job—that's a total of six minutes each time he washes his hands!
- Based on a \$50k income each visit to the wash room costs over \$3!
- Using **HANDS OFF** will reduce the cleaning time to an approx. cost of \$1 each time.

If you have a workforce of (say) ten personnel, working a five day week using **HANDS OFF** will **save**

HANDS OFF INSTRUCTIONS FOR USE:

1. Remove sheet from container as per dispensing instructions.
2. Apply cloth to hands and scrub to remove grease, oil, etc.
3. Dispose of cloth and replace cap on canister.
4. Allow moisture to evaporate from hands for approx. 30 seconds.
5. A residue of moisturiser will remain on hands. Rub into hands for approx. 20 seconds
6. Moisturiser will be evident for several minutes after use.
